

## 温室地布

## Greenhouse Ground Cover

该产品透水透气,可防止土壤板结及水土流失。具备一流的UV稳定性和遮光性,大量降低维护成本。保持土壤湿度,预防积水,有利于植物根部生长,有效防止杂草生长,避免使用除草剂等有害农药,提供有机绿色食品。

同时,黑色地布被广泛应用于室外,其主要功能是有防止杂草生长。它能够覆盖在土壤表面,阻止光线透过并降低杂草生长的概率,从而减少对除草剂的需求。

It is permeable to water and air, preventing soil compaction and erosion. It offers excellent UV stability and shading, significantly reducing maintenance costs. It retains soil moisture, prevents waterlogging, promotes root growth, and effectively inhibits weed growth, eliminating the need for herbicides and harmful pesticides, thus supporting organic farming.

Additionally, black ground cover is widely used outdoors, with its primary function being the effective prevention of weed growth. It can be laid over the soil surface to block light penetration and reduce the likelihood of weed development, thereby minimizing the need for herbicides.

No. 型号	RX GC 100W
Weight of fabric g/m2 成品克重	110
Toxicity 毒性	Without plant toxic elements 对植物无毒
Warranty 保质年限	5 years 5 年
Water Penetration Rate 渗水率(L/m2/s)	10%
Material 材料	PE
